

TRENDS IN THE RETAIL SALES OF DAIRY PRODUCTS

UP TO SEPTEMBER 2020

INTRODUCTION

This report was compiled by the Office of SAMPRO and forms part of the Industry Information Project of SAMPRO. The purpose of the project is to make market signals available to members and other interested parties, which is a prerequisite for effective competition, as envisaged by the Competition Act.

All activities of the Industry Information Project of SAMPRO are designed and implemented in accordance with the Competition Act and independently from commercial interest of any and all the members of SAMPRO.

- 1. For the effective working of the different markets in respect of raw milk and each of the dairy products, objective information regarding key variables is necessary.
- 2. SAMPRO provides regularly a number of reports regarding different key variables (market signals)¹⁾ to members and other parties. From December 2009 retail sales are also covered by quarterly reports of SAMPRO.
- 3. Information regarding the trends in the dairy retail markets in the recent past is extremely important to stimulate timeous adjustment to changes in the needs of the different markets. Such adjustment is in the interests of the consumer, the dairy industry, the appropriate use of national resources and effective competition in the markets concerned.
 - 1) On 25 July 2008, the Management Committee of SAMPRO confirmed that:
 - The task of the Office of SAMPRO in respect of the economic aspects of the dairy industry, is to objectively analyze the available information in respect of market signals;
 - ii. The analysis referred to under i) should be conducted by the Office of SAMPRO independently from the commercial interest of any and all the members of SAMPRO;
 - iii. The analysis should strengthen the knowledge of participants in the markets in respect of market signals in order to promote effective competition which is the prerequisite for a market economy; and
 - iv. The Office of SAMPRO should interact with institutions in the public sector and private sector on issues regarding the development of the dairy industry and conditions in the dairy industry, on the basis of objective information and objective analysis.

- 4. "ACNielsen Marketing and Media" provides information based on monthly surveys of the retail sales of milk and other dairy products. Non-retail sales, such as sales to wholesalers and industrial buyers, which form significant parts of the total sales of dairy products, are not part of the ACNielsen Marketing and Media surveys.
- 5. The surveys of ACNielsen Marketing and Media in respect of UHT milk, flavoured milks, yoghurt, maas and pre-packaged cheese, cover the retail sales in the following types of stores:
 - Major stores (Hypermarkets and a defined group of supermarkets consisting of Shoprite, Checkers, Pick 'n Pay Supers, Pick 'n Pay Family, Superspar and Woolworths (Food))
 - Convenience stores (Branded Superettes consisting of Kwikspar, OK Foods, Sentra, Pick 'n Pay mini, Score, Friendly, Shield (Retail), Friendly's and 7-Eleven and Forecourts)
 - Urban Counter and Self Service
 - Rural Independents
- 6. In the case of fresh milk, cream, butter and cream cheese, the surveys of ACNielsen Marketing and Media cover only "major stores" as described in paragraph 5.
- 7. Although the surveys of ACNielsen Marketing and Media in respect of the products mentioned in the previous paragraph only cover "major stores", the results of the surveys should be regarded as meaningful indicators of the trends in retail sales. In the table below, the ACNielsen Marketing and Media sample for 2019, is expressed as a percentage of the estimated total demand in the same period^{1).}
