South African Milk Processors' Organisation
The voluntary organisation of milk processors for the promotion of the development of the secondary dairy industry to the benefit of the dairy industry, the consumer and the South African society.

TRENDS IN RESPECT OF RAW MILK PURCHASES IN THE YEARS 2021 TO AUGUST 2026

(January to August 2026)

This report was compiled by the Office of SAMPRO and forms part of the Industry Information Project of SAMPRO. The purpose of the project is to make market signals available to members and other interested parties, which is a pre-requisite for effective competition, as envisaged by the Competition Act.

All activities of the Industry Information Project of SAMPRO are designed and implemented in accordance with the Competition Act and independently from commercial interest of any and all the members of SAMPRO.

1. This report is based on information regarding raw milk purchases provided by Milk SA and the following is important:

   a) The preliminary information (estimated figures) regarding the total raw milk purchases per month is based on the sample[1)] results, inflated by taking into account the percentage which the sample results represented of the actual total purchases in respect of the previous 3 months of which actual total figures are available. It should be noted that if the actual market share of the sample group is higher than the figure (percentage) used to estimate the total milk purchases, the estimated total milk purchases will be higher than the actual total milk purchases in that particular month. The opposite is also true; and

   b) The preliminary figures[2)] (estimated figures) regarding the total raw milk purchases in a month (which is the sample figure inflated as described under a)) are replaced in the third month following the month concerned by the ***total raw milk purchased by all registered milk buyers declared in terms of Regulation 1396 of the Marketing of Agricultural Products Act.***

---

1) This report is based on the results of surveys by Milk SA which involves a sample consisting of firms which are collectively responsible for more than 85 percent of the total unprocessed milk purchases in South Africa. The average contribution to the total unprocessed milk purchases of the sample group in the three-month period January to March 2025, is 89.44 percent. In the previous two three-month periods the percentages were 89.52 percent and 89.83 percent.

2) If the information received by Milk SA after the first publication of the preliminary figure (estimated figure) for a particular month, warrants an adjustment to the published preliminary figure, the adjustment is made, and the adjusted estimated figure is published in the next publication.

2. The total quantity of raw milk purchased in South Africa, in each of the twelve years, 2008 to 2024, is indicated in Table 1.

TABLE 1[3]: TOTAL PURCHASES OF RAW MILK IN SOUTH AFRICA ACCORDING TO MILK SA

YEAR	TOTAL UNPROCESSED MILK KILOGRAM	PERCENTAGE CHANGE FROM PREVIOUS YEAR	INDEX 2008 = 100
2008	2 624 511 678	2.50	100.00
2009	2 586 868 067	-1.43	98.57
2010	2 711 236 032	4.82	103.30
2011	2 720 402 147	0.34	103.65
2012	2 842 810 159	4.50	108.32
2013	2 905 811 947	2.22	110.72
2014	2 982 734 596	2.65	113.65
2015	3 172 655 770	6.37	120.89
2016	3 158 466 390	-0.45	120.34
2017	3 253 682 081	3.01	123.97
2018	3 410 535 903	4.82	129.95
2019	3 432 802 395	0.65	130.80
2020	3 427 335 376	-0.16	130.56
2021	3 403 100 413	-0.71	129.67
2022	3 349 861 004	-1.56	127.64
2023	3 339 272 379	-0.32	127.23
2024	3 458 059 966	3.56	131.76
2025[5]	3 483 992 857	0.75	132.75

1. The quantity of raw milk purchased in South Africa as captured in Table 1 shows, amongst other, that:

   a) In the three years from 2011 to 2014, the production of raw milk increased with 9.64 percent, or a compound annual growth rate of 3.12 percent, which is higher than the increase in the previous three years (from 2008 to 2011) of 3.65 percent or a compound annual growth rate of 1.20 percent;

   b) In the three years from 2014 to 2017, the production of raw milk increased with 9.08 percent or compound annual growth rate of 2.94 percent, which is lower than the increase of 9.64 percent in the previous three years (2011 to 2014) or a compound annual growth rate of 3.12 percent; and

---

3) Workgroup of the Industry Information Advisory Committee of Milk SA, consisting of Mr Nico Fouchè, Mr Bertus van Heerden, Mr Alwyn Kraamwinkel and Mr De Wet Jonker.

4) Table prepared by the Office of SAMPRO based on information received from Milk SA on the total unprocessed milk purchased by all registered milk buyers declared in terms of Regulation 1652 of the Marketing of Agricultural Products Act and previous similar regulations.

5) The total quantity of unprocessed milk purchased in 2025, was finalised in March 2026.

a) In the three years from 2020 to 2023, the production of unprocessed milk decreased by 2.57 percent or a compound annual growth rate of -0.86 percent, while in the previous three years (2017 to 2020), it increased by 5.34 or a compound annual growth rate of 1.75 percent; and

b) In the eighteen years from 2008 to 2025, the production of unprocessed milk increased by 32.75 percent or a compound annual growth rate of 1.59 percent.

2. Based on the methodology described in paragraph 1, the trends in respect of **the average quantity of unprocessed milk purchased per day per month** in the years 2021 to June 2026 and **the estimated figures in respect of July and August 2026**, are indicated in Graph 1.

3. From Graph 1, it is clear that:

a) The mass purchased per day in January, February, March, May, June, July and August 2021, is lower than the mass purchased in the same months of 2020, while the opposite is true in respect of April, September, October and December 2021; and

b) The mass purchased per day in January, July and August 2022, is higher than in the same months of 2021, while the opposite is true in respect of February, March, April, May, June, September, October, November and December 2022; and

c) The mass purchased per day in January, February, March, May, June, July, August, and October 2023, was lower than the same months of 2022, the mass of purchases in April, September, November and December 2023, was higher than the same month of 2022.

d) The mass purchased per day in January to December 2024, was higher than the same months of 2023 and;

e) The mass purchased per day in January, February, March, July, August, September and October 2025, was higher than the same months in 2024 and in April, May, June, November and December 2025, it was lower than the same months in 2024; and

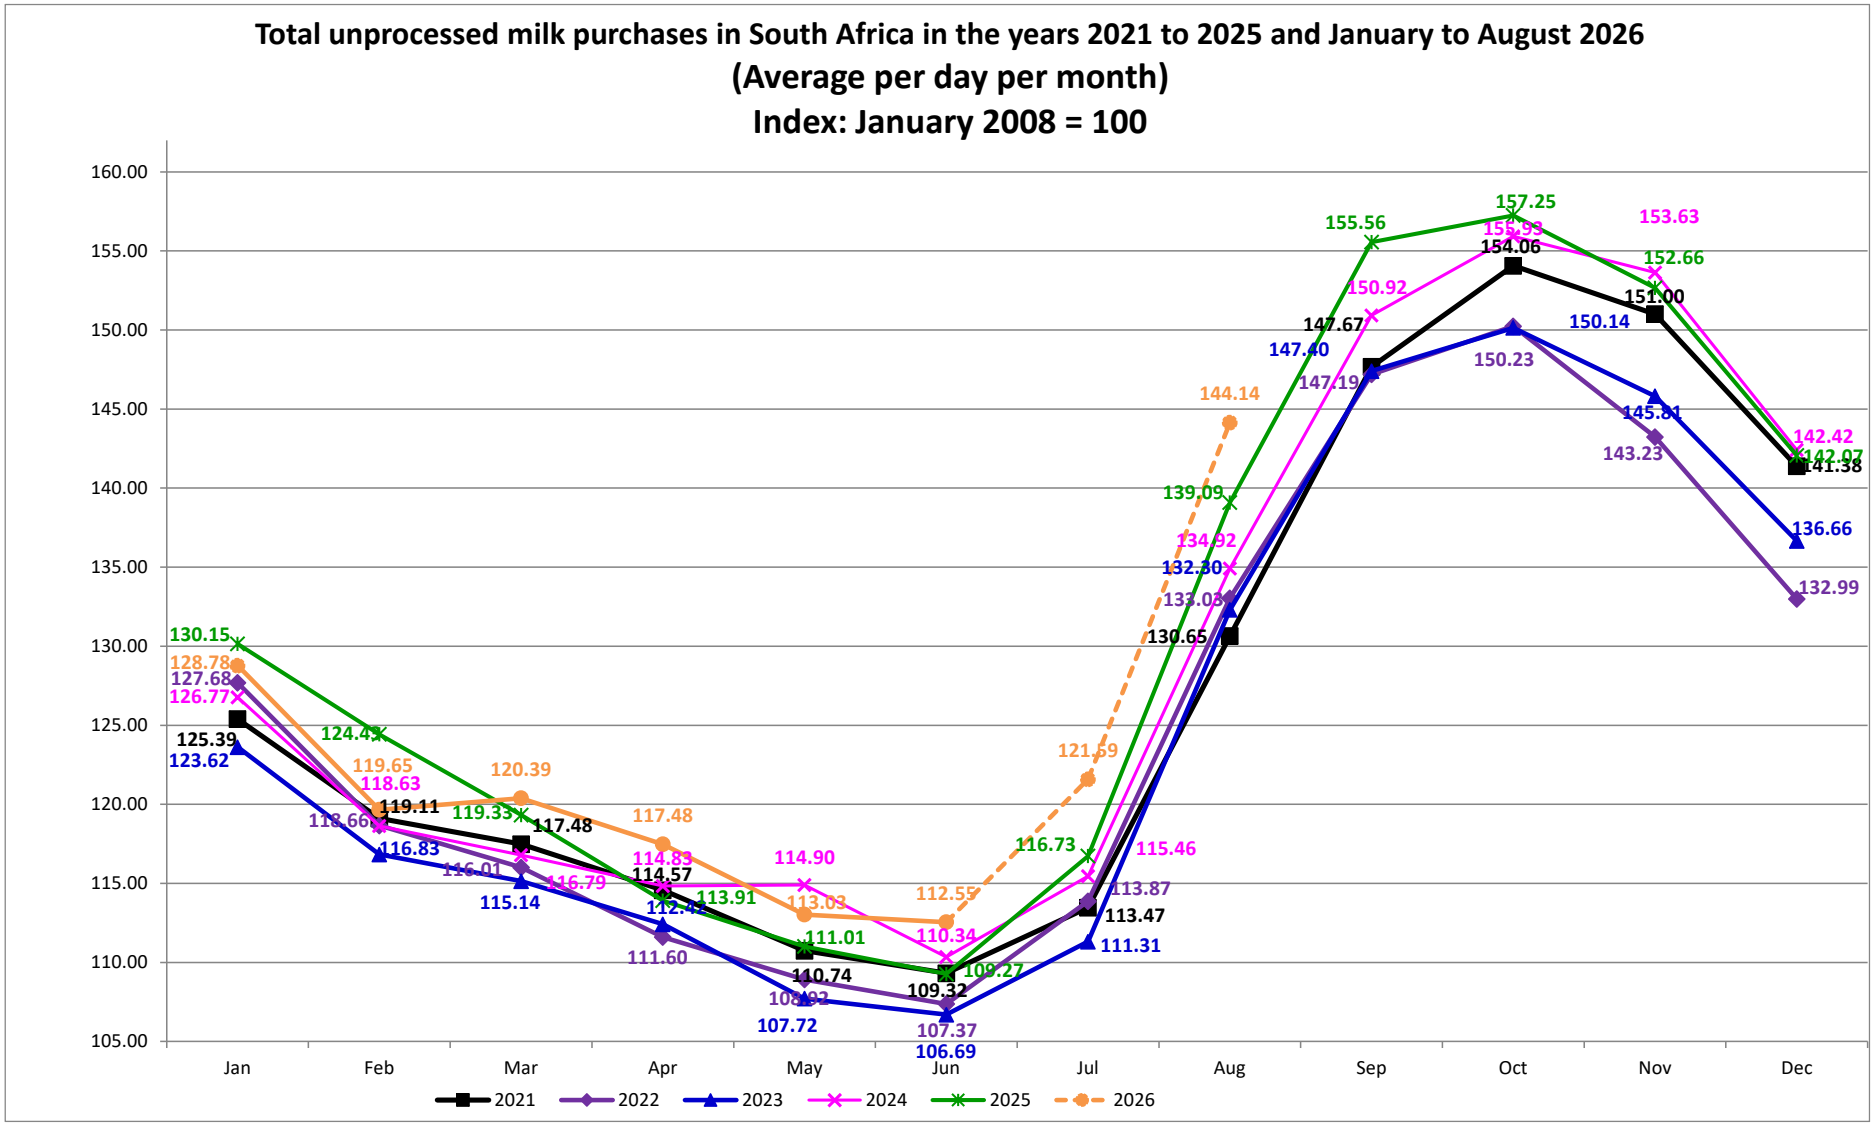

f) The mass purchased per day in January and February 2026, was lower than the same months in 2025, while the mass purchased per day in March, April, May and June, was higher than in the same months of 2025. The estimated purchases in July and August, were also higher than in the same months of 2025.

Compiled by: Marietjie Le Roux, De Wet Jonker and Alwyn P Kraamwinkel

23 September 2026

GRAPH 1[5)]

6) Graph prepared by the Office of SAMPRO based on information obtained from MILK SA. The information in respect of 2021 to August 2026, is in respect of the total unprocessed milk purchased by all registered unprocessed milk buyers, declared in terms of Regulation 7620 of the Marketing of Agricultural Products Act and previous similar regulations. The figures for July and August 2026, are estimated figures determined on the assumption that the market share of the sample in the total unprocessed milk purchased is 89.08 percent, as was the case in the three-month period, April to June 2026.
